

Data Strategy & Governance

GOVERN · PROTECT · TRUST · SCALE

Establish data as a trusted enterprise asset. SkillCloud delivers agile governance frameworks, transparent processes, and regulatory compliance for high-quality, actionable data at enterprise scale.

50%+
Compliance Risk Reduced

3x
Faster Audit Readiness

100%
Trusted Data

KEY OFFERINGS

Build, govern, and trust your data — across every domain and system

DME

Data Maturity Evaluation

Assess current data capabilities and practices — identify strategic gaps, quick wins, and long-term roadmap priorities aligned to business goals.

GOV

Governance Frameworks

Implement policies, roles, and controls ensuring GDPR, DPDPA, and industry compliance — no matter your scale or regulatory environment.

MDM

Master Data Management

Centralize, enrich, and validate key business data — break down silos and enable consistent, trusted analytics across every system.

CAT

Metadata Cataloging

Map, document, and monitor your data landscape — drive discoverability, security classification, and rapid audit readiness.

DQA

Data Quality Assurance

Automate quality checks, resolve anomalies, and elevate trust in every report, dashboard, and critical business decision.

RSK

Risk Mitigation

Identify, monitor, and remediate data risks — continuous improvement through robust stewardship and change management practices.

LIN

Data Lineage & Traceability

End-to-end lineage tracking from source to consumption — ensure impact analysis, debugging, and regulatory auditability.

STW

Data Stewardship Program

Define data owners, stewards, and custodians with clear accountability models, escalation paths, and business-driven governance workflows.

GOVERNANCE FRAMEWORK — 5 PILLARS

People	Policy	Process	Platform	Metrics
<ul style="list-style-type: none"> • Data Owners • Stewards • Custodians • Council • Champions 	<ul style="list-style-type: none"> • Data Standards • Retention Rules • Classification • Lineage Policy 	<ul style="list-style-type: none"> • Onboarding Flows • Issue Mgmt • Change Control • Escalation Paths 	<ul style="list-style-type: none"> • Data Catalog • Quality Engine • MDM Tool • Lineage Graph 	<ul style="list-style-type: none"> • DQ Scores • Compliance % • Adoption Rate • Issue SLA

COMPLIANCE & REGULATORY COVERAGE

<p>GDPR GDPR</p> <p>EU data privacy by design with right-to-erasure and consent management workflows.</p>	<p>DPDPA DPDPA</p> <p>India's Digital Personal Data Protection Act — localisation, consent & grievance frameworks.</p>	<p>SOC 2 SOC 2</p> <p>Trust service criteria for security, availability, confidentiality & processing integrity.</p>
<p>ISO 27001 ISO 27001</p> <p>Information security management, risk treatment & continuous control monitoring.</p>	<p>HIPAA HIPAA</p> <p>PHI safeguards for life sciences & healthcare data workloads.</p>	<p>BCBS 239 BCBS 239</p> <p>Risk data aggregation & reporting principles for financial institutions.</p>

DATA MATURITY PROGRESSION

<p>L1</p> <p>INITIAL</p> <p>Ad-hoc data handling. No formal policies. High duplication & inconsistency.</p>	<p>L2</p> <p>AWARE</p> <p>Basic standards emerging. Some ownership assigned. Quality issues identified.</p>	<p>L3</p> <p>DEFINED</p> <p>Formal governance policies in place. MDM initiated. Compliance baseline met.</p>	<p>L4</p> <p>MANAGED</p> <p>Metrics-driven governance. Automated quality checks. Audit-ready lineage.</p>	<p>L5</p> <p>OPTIMISING</p> <p>Self-service trusted data. Predictive quality. AI-assisted governance at scale.</p>
